

A woman with short brown hair, wearing a grey tank top, is shown in profile, looking upwards and to the right. She is in a complex, metallic environment, likely the interior of a starship. In the background, there is a large circular porthole showing a view of space with stars. To her right, there are various mechanical components, including a red and white device. She is holding a small black component in her right hand and a larger black component in her left hand, appearing to be working on or adjusting something.

**Switch on the uni-  
flecked epsilon trapezoid**

**Then, rig the axis bobbin  
wheel and set meteor  
spoon to yellow.**

**SpaceHack starship flight control system - it practically flies itself. STAR  
CORPS**
